Please see attached chemotherapy handouts for specific side effects and details for your treatment regimen.

Follow-up appointments with your care team and for laboratory tests will be determined according to your specific needs, disease, and treatment plan. Please call the office at (817) 594-2052 with any concerns or symptoms that are not controlled. During the treatment, we are the first call for any non-life threatening issues. We have staff on call 24 hours a day, 7 days a week, and urgent care appointments are available if needed.

You will meet with a financial counselor to discuss your insurance coverage and out of pocket costs for therapy. We also have other staff available to assist with many of your other needs. Please ask staff for details.
